# AZ INTRODUCTION

With more than 9 years of experience and 130 employees, in the design and production of architectural aluminium systems, our team of skilled engineers and technicians use cutting-edge technology to manufacture highquality windows and doors that meet international standards. Our products are also known for their durability and low maintenance, ensuring a long-lasting investment for our clients.

## SLIDING WINDOW AND DOOR SYSTEM

## SLIM OFFICE PARTITION SYSTEM

With our extensive range of products and customized solutions, we cater to diverse industries such as commercial, residential, healthcare, hospitality, and education. Our customer-centric approach, combined with our technical expertise, has enabled us to establish a strong reputation in the industry. We aim to provide our clients with reliable and efficient solutions that exceed their expectations.

# CORE VALUE

---

**QUALITY** : We prioritize crafting the best possible aluminium doors and windows to meet our customer's needs and satisfaction.

**INNOVATION** : We embrace creative solutions and innovative technology to produce modern and stylish aluminium doors and windows.

**SUSTAINABILITY** : We prioritize designing environmentally-friendly products by utilizing sustainable materials and reducing waste in our manufacturing process.

# MISSION

---

Our mission is to offer the best value to our customers by designing, developing, and producing aluminium doors and windows with the highest standards of quality, durability, and energy efficiency. We strive to provide excellent customer service, timely deliveries, and competitive pricing while maintaining a safe and sustainable manufacturing process. We aim to achieve growth and profitability through innovation, investment in technology and talent, and continuous improvement in all aspects of our business.

# GLOBAL PRESENCE

---

# VISION

---

To become the leading manufacturer of high-quality aluminum doors and windows, providing innovative and sustainable solutions that exceed customer expectations and contribute to a greener future.

# PRODUCTION FACILITY

One of AZ's key competences is its vertical integration. It allows us to optimize our resources and minimize costs, which ultimately leads to better pricing and more value for our customers. It also means that we can easily adapt to changes in the market and quickly innovate to stay ahead of the competition.

Our state-of-the-art machinery and equipment, along with our skilled workforce, enables us to provide customized solutions to meet the most demanding requirements of our customers.

Overall, AZ's high vertical integration, combined with our commitment to quality, innovation, and customer satisfaction, makes us a reliable partner for businesses across different industries.

## INNOVATION, DESIGN, PERFORMANCE

Research & Development is part of our DNA. Our experienced and specially trained engineers are designing new systems and continuously inventing technical solutions. In the company's advanced laboratories there is ongoing research on systems which corporate excellent design, top performance and outstanding energy efficiency. By using state-of-the-art equipment (e.g. 3D Printers, CNC Machines) and thanks to our advanced testing center, we are always at the forefront of technological development, always one step ahead.

# QUALITY ASSURANCE & CERTIFICATIONS

In-house quality control laboratories to ensure top quality, we test our products along the entire production process through our multiple in-house quality control laboratories.

- 1) Tensile strength Lab: Extrusion Lines.
- 2) Powder coating Lab: Fully equipped laboratory.
- 3) Anodizing Lab: Fully equipped laboratory.
- 4) Material Analysis Spectrograph: Aluminium Foundry.
- 6) New Products Testing Lab. Incoming products

Products which are not produced by the company are strictly tested before they enter the warehouse. If they comply with the AQL 2.5 criteria, they can be released for sale.

## PERFECTION THROUGH CONTINUOUS TESTING

Training of employees on quality aspects paying close attention to the importance of the human factor in achieving high quality, we define for each position a specific quality control directive which must be followed carefully. Additionally, group trainings are carried out regularly regarding new products, as well as re-trainings for existing ones.

Capable of everything! AZ's industrial sites are operating:

- Multiple CNC lines, bending machines
- Auto cutting machines
- Milling machines & punching machines
- Drilling machines
- Accessories assembling lines
- Automated packaging lines
- Polishing machines & sand blast lines
- Sound wall machines
- Windows & doors fabrication unit

WE SUPPORT YOU STEP BY STEP

- Providing complete solutions and detailed technical plans to architects, construction companies and fabricators by using state-of-the-art computer software.
- Our engineering team offers comprehensive technical and engineering services for large construction projects across the globe, collaborating closely with architects, project developers, construction companies & fabricators.
- Proposing new aluminium systems, in collaboration with AZ's advanced R&D department, so as to enrich the company's product range and meet fully customer needs.
